

C.A.T. Group Waste Reduction Policy

C.A.T Group is committed to continuous improvement in its waste management practices reducing the amount of waste produced on construction sites and offices. The aim being to promote increased awareness for the treatment of waste for re-use or re-cycling to minimize the amount of waste produced and sent to landfills.

C.A.T. Group acknowledges its Legal obligations to comply with current Environmental legislation and will act responsively to manage waste by the following:

REDUCE

- Dispose of less material using robust management practices and encourage personnel to adopt the same principle.

RE-USE

- Make use of existing materials wherever possible

RE-CYCLE

- Identify and segregate materials for recycling.

RESPONSIBLE DISPOSAL

- Complying with current Waste Management Legislation, Company Policy and Procedures for the disposal of waste.

C.A.T. Group shall raise awareness of waste management issues with all employees, at all levels, at sites and offices, including all subcontractors that produce waste.

Continuous improvement shall be guided by the environmental benefits, any new legislation and regulatory compliance, along with constant reviews of waste management procedures and amount of waste produced.

This Waste Reduction Policy together with the Environment Policy and Objectives shall be periodically assessed as per our Management Review process to ensure relevance, compliance, appropriateness, and improvements to our activities.
